

Justin Bonner for Congress

Medicare for All

Healthcare is a right that should be guaranteed to all Americans. **Instead of** paying insurance premiums and copays to private insurance companies, we should put that money into a single payer medicare for all system. It's like the fire department, we all pay for it in our taxes and we don't have to worry about not having money to pay the firemen if our homes catch on fire.

Abolish the NSA

The NSA violates the 4th amendment as it's job and sends programmers court orders demanding they put dangerous backdoors into software and to stay quiet about it. Allowing the NSA to continue to exist is giving up on any idea of freedom of privacy. I want to completely get rid of the NSA and to close all court ordered backdoors in software as well as lifting any relevant gag orders.

Free Public Higher Education

Currently everyone in the US can attend tuition free public elementary school, tuition free public middle school, and tuition free public high school. Tuition free public college is the next obvious step. I fully support this but we have to go further. I propose tuition free public education at all levels of schooling, preschool through medical school. This becomes more important every year as higher education becomes more and more essential for being able to perform value producing work.

Ranked Choice Voting

I hate the two party system. Ranked choice voting lets third party candidates have a real chance in elections. It is the only real way of breaking the monopoly the Democratic and Republican parties have on political power.

Money Out of Politics

Most Americans understand that our political system does not work for them. That's because in its current state it isn't supposed to. It's supposed to work for large corporations and the extremely wealthy who bankrupt politicians. If we want any hope of redesigning our political system to work for us we have to start by getting money out of politics. That means overturning the Citizens United Supreme Court decision and having elections that are publicly funded. Elections should not be decided by who can afford the most ads.

Green New Deal

Climate change is a threat to every person on the planet. We need to transform the economy to beat it like we did to win World War 2, except this time we're fighting for a stable climate. A Green New Deal means a job for every American that wants one, mass investment in nuclear fusion research, mass production of electric vehicles, mass production of all forms of green energy: solar, wind, hydro, geothermal, and nuclear. We have a problem, we need to solve it directly. Subsidies and tax incentives aren't going to cut it.

Democratic Primary: August 11th 2020
General Election: November 3rd 2020
